## APPLICATION

This Tariff contains the regulations and rates applicable to intrastate telecommunications services furnished by The AT&T Communications of the Mountain States, Inc. in the State of Arizona.

## EXPLANATION OF TARIFF CHANGE SYMBOLS

These symbols will appear in the right hand margin, when applicable.

- (C) - To signify changed regulation
- (D) - To signify discontinued material
- (I) - To signify rate increase
- (M) - To signify material moved from or to another part of the  
Tariff with no change, unless there is another Tariff change  
symbol present
- (N) - To signify new material
- (T) - To signify a change in text but no change in rate or  
regulation
- (R) - To signify rate reduction

SECTION 1 - DEFINITIONS

1.1 DEFINITION OF TERMS

ACCESS LINE

A transmission path that connects a Customer premises to an AT&T Central Office.

ACCESS LINE GROUPING

An access line or group of access lines with the same identifying number. A group of access lines may be either standard or special access lines, but must be all of one type.

ACCESSORIES

Devices which are mechanically attached to, or used with, the facilities furnished by the Carrier and which are independent of, and not electrically, acoustically, or inductively connected to, the conductors in the communications path of the Carrier facilities.

ASSEMBLY

A configuration consisting of Customer equipment and/or a Customer communications system or systems, which is connected to Custom Network Services.

AT&T CENTRAL OFFICE

The physical point of access for a service to the AT&T interoffice network. Criteria for establishing AT&T Central Offices and a list of AT&T Central Offices with services provided can be found in the AT&T Business Service Guides.

(C)  
(C)

AUTHORIZED USER

A person, firm or corporation who is authorized by the Customer or joint user to be connected to the service of the Customer or joint user, respectively. An authorized user must be specifically named in the application for service and on whose premises a station of the service must be located.

ADMINISTRATIVELY  
APPROVED FOR FILING

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### BAUD

A unit of signaling speed. It is the reciprocal of the time duration in seconds of the shortest signal element (mark or space) within a code signal. The speed in bauds is the number of signal elements per second.

#### BIT

The smallest unit of information in the binary system of notation.

#### BRIDGING

The process of connecting local channels of a multipoint channel service in a wire center by use of a bridging device.

#### BUILDING

A structure consisting of an enclosed area surrounded by outside walls and under one continuous roof.

#### CALL

A completed connection established between a calling station and one or more called stations.

#### CALLED STATION

The station (e.g., telephone number) called, or the terminating point of a call.

#### CALLING CARD (1)

A billing arrangement by which a call may be charged to an authorized Carrier Calling Card account.

#### CALLING STATION

The station from which the call is originated.

#### CARRIER

Refers to AT&T Communications of the Mountain States, Inc.

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### CATEGORY I

Connections to those voice grade circuits identified in Section 68.2 (a) (2) of the FCC Rules and Regulations.

#### CATEGORY II

Connections not within the scope of Part 68 of the FCC Rules and Regulations.

#### CATEGORY III

Connections to those voice grade circuits identified in Section 68.2 (a) (3) of the FCC Rules and Regulations.

#### CENTRAL OFFICE

A switching unit providing telecommunications services to the general public for terminating and interconnecting lines. More than one central office may be located in the same building.

#### CHANNEL

A path for communication between two or more stations furnished in such a manner as the Carrier may elect.

#### CHANNEL EQUIPMENT

The equipment used by the Carrier to: terminate, switch, condition, enhance signaling or improve transmission of a channel.

#### CHANNEL SERVICE

The channels (local, interoffice and interexchange) furnished to a Customer as a channel service without intermediate switching arrangements.

#### CHANNEL SERVICE UNIT

A channel service unit is equipment which performs the function of properly terminating a Digital Data Local Channel.

APPROVED FOR FILING

DECISION #: 56553

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### CHANNEL TERMINAL

The portion of a channel service required to terminate the interexchange or interoffice transmission system. This is predominantly Carrier multiplex equipment required to derive voice grade channels from line facilities.

#### COMMERCIAL CREDIT CARD

A billing arrangement by which a call may be charged to an authorized commercial credit card number.

#### COMMON USER NETWORK

A network furnished by this Carrier which may be used by more than one Customer.

#### COMMUNICATIONS SYSTEMS

Non-Carrier dedicated channels and equipment furnished for communications between premises.

#### CONNECTING ARRANGEMENT

The equipment provided by the Carrier to accomplish the direct electrical connection of Customer facilities with the facilities of the Carrier.

#### CONNECTING COMPANY/CARRIER

Any telephone company or carrier whose facilities may be connected with those of the Carrier for the purpose of furnishing telecommunications services.

#### CONTRACT

The service agreement between a Customer and the Carrier under which facilities for communications between specified locations are furnished, in accordance with the provisions of this Tariff.

#### CUSTOMER

The person, firm, corporation or government agency contracting for service and responsible for the payment of charges and compliance with Carrier regulations. A channel service Customer must have a communications requirement of their own.

APPROVED FOR FILING

DECISION #: 56553

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### CUSTOMER EQUIPMENT

Station or terminal equipment provided by the Customer, authorized user or joint user.

#### CUSTOMER COMMUNICATIONS SYSTEM

Dedicated private line channels and equipment (e.g., microwave or cable system) furnished by the Customer for communications between premises.

#### DATA ACCESS ARRANGEMENT

A protective connecting arrangement for use with the network control signaling unit, or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with criteria specified in Section 9 of this tariff.

#### DIGITAL ACCESS LINE

A path for digital transmission furnished within the serving area of a digital city between the central office and a station.

#### DIGITAL CITY

A city in which a central office is located and serves a specific geographic area for Dataphone® Digital Service.

#### DIGITAL CITY RATE CENTER

A specified geographical location in a Digital City from which mileage measurements are determined for the application of channel and Digital Access Line mileage rates.

#### DIGITAL SERVICES

Services for transmission of digital signals using only digital transmission facilities.

APPROVED FOR FILING  
DECISION #: 56553

® Registered Service Mark of AT&T

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### DIRECT ELECTRICAL CONNECTION

A physical connection of the electrical conductors in the communications path.

#### DUPLEX

Service which provides for simultaneous transmission in both directions.

#### EXCHANGE

A geographical unit established for the administration of telecommunication services in a specified area.

#### 56 KBPS SWITCHED DIGITAL SERVICE CENTRAL OFFICE

An AT&T Central Office where 56 Kbps Switched Digital Service is furnished.

#### FOREIGN EXCHANGE SERVICE

Provides Customers with the capability of local exchange service in a remote exchange via a channel service.

#### GRANDFATHERED

A term which describes Customer equipment that was directly connected as specified below and that is grandfathered under Part 68 of the Federal Communications Commission, Rules and Regulations because:

- The terminal equipment was directly connected to the telecommunications network or local exchange services prior to July 1, 1979.
- The multiline terminating system was directly connected to the telecommunications network or local exchange service prior to January 1, 1980.
- The protective circuitry was directly connected to the telecommunications network or local exchange service prior to the dates set forth preceding.

#### HOME NPA

As used in connection with AT&T MEGACOM 800 Service, the NPA of the AT&T MEGACOM 800 Service Central Office from which a Customer has obtained service. As used in connection with AT&T 800 READYLINE the NPA from which a Customer obtains AT&T 800 READYLINE Service.

APPROVED FOR FILING

DECISION #: 56560

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### INTEREXCHANGE CHANNEL

The portion of a channel service that interconnects exchanges where stations or channel terminations are located.

#### INTERFACE

That point on the premises of the Customer, authorized user or joint user where the channel service terminates and connection is made with Customer equipment.

#### INTEROFFICE CHANNEL

That portion of a channel service which interconnects an interexchange channel with a local channel.

#### INTEROFFICE CHANNEL TERMINAL

The portion of a channel service required to terminate the interoffice transmission system. Interoffice channel terminals provide the function of interconnecting interoffice channels and local channels.

#### JOINT USER

A person, firm or corporation who is designated by the Customer as a user of a channel service furnished to the Customer and to whom a portion of the charge for the service will be billed under a joint user arrangement.

#### LOCAL ACCESS AND TRANSPORT AREA (LATA)

A geographic area established by a local exchange carrier which delimits its operational area and may include points outside the state.

#### LOCAL CHANNEL

The portion of a channel service required for connecting the interexchange or interoffice channel of a channel service to a Customer location.

#### LOCAL EXCHANGE CARRIER

The carrier that provides local exchange service within an authorized serving area.

APPROVED FOR FILING  
DECISION #: 56553

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### MESSAGE TELECOMMUNICATIONS SERVICE (MTS)

A communication between two or more stations located in different local service areas.

#### MISCELLANEOUS COMMON CARRIER

A communications common carrier which is engaged in providing service by radio through a base station authorized by the Federal Communications Commission but who does not also provide a public land wire telecommunications service.

#### MULTILINE TERMINATING SYSTEM

Premises switching equipment and key telephone type systems which are capable of terminating more than one local exchange service line, WATS access line, channel service or communications system.

#### MULTIPOINT SERVICE

A service which provides communications capability between more than two channel service station locations constituting a common dedicated communications system.

#### NETWORK CONTROL SIGNALING

Transmission of signals used for telecommunications services which perform functions such as supervision (control, status, and charging signals), address signaling (e.g., dialing), calling and called number identification, audible tone signals (call process signals indicating reorder or busy conditions, alerting, coin denominations, coin collect and coin return tones) to control the operating of switching machines.

#### OBSOLETE SERVICES

Services referred to as obsolete are no longer suitable to meet the current needs of the general public. They will not be furnished as a new entire item of service to any Customer or applicant.

#### OFF-NETWORK CALL

A call between a station on a Custom Network Service and a station which is not associated with a Custom Network Service.

APPROVED FOR FILING  
DECISION #: 56553

SECTION 1 - DEFINITIONS

ORIGINAL

1.1 DEFINITION OF TERMS (Cont'd)

ON-NETWORK CALL

A call between stations on a Custom Network Service.

PREMISES

A building or buildings on continuous property (except rights-of-way, etc.) not separated by a public thoroughfare.

PROTECTIVE CIRCUITRY

Discrete electrical circuitry that is within the scope of the Registration Program and is designed to protect Custom Network Service from harm.

RATE CENTER

A specified geographical point within or outside an exchange area, from which mileage measurements are determined for the application of mileage rates for either channel services or message telecommunications services rates.

REGISTERED

A term which means compliance with and approval within the Registration Program.

REGISTERED EQUIPMENT

Equipment which complies and has been approved within the registration provisions of Part 68 of the FCC Rules and Regulations.

REGISTRATION PROGRAM

Part 68 of the FCC Rules and Regulations which permits Customer Equipment to be directly connected to Custom Network Service and certain circuits without the requirement for protective circuitry.

SPECIAL ACCESS LINE

A dedicated communication path that connects a Customer premises to an AT&T switched service using services obtained from the AT&T Business Services Guides or access obtained from others. (C)  
(C)

SPECIAL ACCESS SURCHARGE

This is a surcharge, which is required to compensate the Local Exchange Carriers for use of the local exchange network. The surcharge applies to all voice grade and equivalent voice grade channel service terminations which are capable of connection to the local exchange network.

# ORIGINAL

## SECTION 1 - DEFINITIONS

### 1.1 DEFINITION OF TERMS (Cont'd)

#### STANDARD ACCESS LINE

A transmission path that connects a customer premises to an AT&T custom service using local exchange company central office switching equipment and a common user transmission path to an AT&T central office.

#### STATION

A signaling unit and other type equipment at a point on a premises which allows the Customer to establish communication or at which a channel is terminated. Or any location from which Custom Network Service calls can be placed and/or received.

#### SWITCHING EQUIPMENT

Equipment which performs the function of establishing and releasing connections on a per call basis between stations, telecommunications services, or communications systems.

#### TERMINAL EQUIPMENT

Any telecommunications equipment other than a multiline terminating system, or communications system connected to Custom Network Service at a Customer's or User's premises.

#### WIRE CENTER

The building, (1) which houses the local equipment from which channel services are furnished and (2) where cable facilities are terminated which furnishes service within a designated wire center serving area.

##### - Primary Wire Center

The wire center in a multi-wire center exchange in which most interexchange circuits terminate.

##### - Serving Wire Center

The wire center from which service is provided to the Customer.

##### - Wire Center Serving Area

The area of the exchange served by a single wire center.

APPROVED FOR FILING DECISION #: <u>56553</u>
---

SECTION 2 - GENERAL REGULATIONS

ORIGINAL

2.1 ESTABLISHING AND FURNISHING SERVICE

The general regulations are applicable in addition to the specific regulations for service offerings in other sections of this Tariff.

Effective July 31, 2001 all references herein to AT&T FCC Tariffs, insofar as the service offering set forth in the AT&T FCC tariffs have been or become detariffed, shall be construed to be references to the AT&T Business Services Guides located at <http://www.att.com/serviceguide/business>.

(N)

The terms, conditions and Customer eligibility described in this tariff are specific to the intrastate consumer service offers. All other applicable terms and conditions can be found in AT&T's FCC Tariff No. 27 until July 31, 2001, and effective on and after August 1, 2001, in the consumer AT&T Service Guides located at <http://www.att.com/serviceguide/home>. Customers who cannot access the web can call 1-888-288-4099 to get a copy of the Service Guide for their calling plan mailed to their residence.

(N)

The Carrier reserves the right to limit use and/or duration of telecommunications services.

2.1.1 APPLICATIONS FOR SERVICE

Applications for establishment or changes of service may be made to the Carrier verbally or in writing. The Carrier or the authorized agent reserves the right to refuse an application for service made by a present or former Customer who is indebted to the Carrier or the authorized agent on the Customer's behalf for service previously furnished, until the indebtedness is satisfied.

2.1.2 CANCELLED APPLICATIONS

Applications for new service, additions or modifications which are cancelled before service is established or before the work is completed may result in a charge to the Customer for all expenses incurred before the cancellation notice is received. However, the charges shall not exceed those which would apply if the work involved in the application or the request were completed, i.e., all applicable service connection, etc.

2.1.3 CANCELLATION FOR CAUSE

The Carrier by written notice to the Customer five days prior to termination, may immediately cancel the application for or discontinue service without incurring any liability for the following reasons:

- Nonpayment of any sum due the Carrier.
- A violation of any condition governing the furnishing of service.
- By order of a court or other governmental authority having jurisdiction.

# ORIGINAL

## SECTION 2 - GENERAL REGULATIONS

### 2.1 ESTABLISHING AND FURNISHING SERVICE (Cont'd)

#### 2.1.4 OBLIGATION TO FURNISH SERVICE

The Carrier's obligation to furnish service is dependent on its ability to secure and maintain suitable rights and facilities, without unreasonable expense, and to provide for the installation and maintenance of those facilities.

#### 2.1.5 OWNERSHIP AND USE OF FACILITIES

Facilities furnished by the Carrier on the premises of a Customer are the property of the Carrier. Carrier agents and employees must be allowed to enter the Customer's premises at any reasonable hour for installing, inspecting, maintaining, repairing the facilities, or removing them. This remains the responsibility solely of the Carrier, or its agents, unless otherwise specified.

### 2.2 OBLIGATIONS AND LIABILITY OF THE CARRIER

The liability of the Carrier for damages arising out of mistakes, omissions, interruptions, delays, errors, or defects in transmission occurring in the course of furnishing service and not caused by the negligence of the Customer, or of the Carrier, in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision shall in no event exceed an amount equivalent to the proportionate charge to the Customer for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission occurs.

The Carrier is liable for damages to a Customer's premises caused by its gross negligence or willful misconduct.

The Carrier is not liable to the Customer for certain claims, losses or damages arising from the use of service furnished under this Tariff, such as:

Claims for libel, slander, invasion of privacy, or infringement of copyright arising from any communication; claims for patent infringement arising from combining or using the Carrier service in connection with facilities or equipment furnished by others; or other claims arising out of any act or omission of others relating to the service provided by the Carrier.

APPROVED FOR FILING

DECISION #: 55953

ORIGINAL

SECTION 2 - GENERAL REGULATIONS

2.2 OBLIGATIONS AND LIABILITY OF THE CARRIER (Cont'd)

The Carrier does not guarantee or make any warranty or accept liability for claims, losses, or damages with respect to its service when used in an explosive atmosphere.

The Carrier may require the Customer to sign an agreement before furnishing the service.

The Carrier is not liable for any act or omission of any other company or companies furnishing a portion of the service.

The Carrier does not transmit messages but offers the use of its facilities, when available, for communications between parties.

2.3 OBLIGATIONS OF THE CUSTOMER

The Customer, authorized user or joint user shall provide, install, maintain and bear the expense of the provision of power required to operate Carrier facilities.

The Customer, authorized user or joint user is responsible for reimbursing the Carrier for any loss through theft or damage to facilities caused by negligence or willful acts.

The Carrier's facilities should be available for maintenance purposes at a time agreeable to both the Carrier and the Customer. An allowance will not be made for the period during which the service is interrupted for maintenance. For all channel services the facilities shall be available to the Carrier once in each twenty-four hours.

The Customer is responsible for provision, installation and maintenance of sealed conduit with explosive-proof fittings between facilities furnished by the Carrier in explosive atmospheres and points outside the hazardous area where connection may be made with regular facilities of the Carrier. The Customer must install and maintain service at locations within the hazardous area if, in the opinion of the Carrier, injury to employees or damage to property might result, unless otherwise specified in this Tariff.

APPROVED FOR FILING

DECISION #: 55453

SECTION 2 - GENERAL REGULATIONS

ORIGINAL

2.4 TRANSFER OF SERVICE BETWEEN CUSTOMERS

An applicant may supersede the service of a Customer where an arrangement acceptable to the Carrier is made by the Customer and the applicant to pay all outstanding charges against the service.

2.5 TERMINATION OF SERVICE FOR CAUSE

The Carrier may terminate service, with written notice 5 days prior to termination, due to:

- Nonpayment, Abandonment, Obscenities, Abuse, Fraud, Harassment. (T)

The Company or authorized agent will restrict access to the network when an account is delinquent; in the event of abandonment of a station; the use of foul or profane language over the line of the company; the use of service that interferes with another Customer's service or used for purposed other than communication; the impersonation of another with fraudulent intent. Abuse or fraudulent use of service includes the use of service or facilities of the Company to transmit a message or to locate a person otherwise to give or obtain information, without payment of a message toll charge; or use of the service to harass another person. (T)

- If any law enforcement agency advises the Carrier that the service is being used for unlawful purposes.

The Carrier may terminate service, without written notice, due to the violation of Tariff regulations.

- RIGHT TO REFUSE SERVICE (N)

The Company reserves the right to refuse service to any applicant, or any applicant who wishes to establish service for a former Customer who has been found to be indebted to the Company for service previously furnished. The refusal of service will remain in effect until satisfactory arrangements have been made for the payment of all such indebtedness. At any time the above conditions become apparent to the Company, it may, at its discretion, terminate or suspend service until the prior indebtedness has been satisfied. (N)

2.6 PAYMENTS AND DEPOSITS

2.6.1 PAYMENT OF BILLS

All charges for service and facilities exclusive of toll messages are payable in advance by check, money order, cash or electronically in lawful United States currency. Charges for toll messages are payable upon receipt of the bill. (T)

The Customer is responsible for the payment of all charges for service, facilities and messages placed from or accepted at the Customer's station. Service may be terminated or suspended for non-payment. (T)

APPROVED FOR FILING

DECISION #: N/A

SECTION 2 - GENERAL REGULATIONS

ORIGINAL

2.6 PAYMENTS AND DEPOSITS (Cont'd)

2.6.1 (Cont'd)

Payment, which is not honored by the payer, bank or institution, will be considered as nonpayment, and a return check charge of \$25.00 will apply. When a local exchange company provides the billing function on behalf of the Company, the local exchange company's return check charge applies. (I)

2.6.2 LATE PAYMENT CHARGE

Subject to billing and systems availability, when a bill or estimated bill for AT&T Switched Service charges is presented to the Customer, any amounts for which payment has not been received within 30 calendar days of the invoice date will be considered delinquent. The Customer may be assessed a Late Payment Charge on any delinquent account balance. The period subject to the Late Payment Charge shall commence on the 31st calendar day after the invoice date, and continue from month to month until the delinquent balance is resolved. The Late Payment Charge shall be assessed monthly, based on the delinquent balance maintained on the account at that time. The Late Payment Charge shall be an amount equal to the outstanding delinquent balance multiplied by the applicable interest rate. The interest rate shall be 18% annually, simple interest (1.5% per month, simple interest) unless an applicable law or regulation specifies a lower rate to be charged, and that lower rate shall then apply. The Customer shall not be charged a Late Payment Charge on a delinquent balance, however, if an applicable law or regulation prohibits the imposition of such charges.

In the event a Customer disputes, in good faith, the validity of any charges appearing on its invoice, the amount of these disputed charges will be excluded from the total delinquent balance while the dispute is pending. If the Company sustains the charges after investigating the dispute, the applicable Late Payment Charges shall be deemed correct and binding on the Customer. If, alternately, the Company credits the charges after investigating the dispute, the Late Payment Charges will not apply.

When a local exchange company provides the billing function on behalf of the Company, the local exchange company's local exchange service late payment charge applies. Late payment charges do not apply until after the due date of the bill on which the usage charges first appear.

2.6.3 ADVANCE PAYMENTS

The Carrier reserves the right to require advance payments for service. The amount of advance payment is credited to the Customer's account and applies to any indebtedness under the contract.

ORIGINAL

SECTION 2 - GENERAL REGULATIONS

2.6 PAYMENTS AND DEPOSITS (Cont'd)

2.6.4 DEPOSITS

The Applicant or Customer may be required to make a deposit to be held as a guarantee for the payment of charges for services furnished. When service is terminated, the amount of the deposit, with interest, will be applied to any indebtedness to the Carrier. A deposit will be refunded or credited to the Customer's account after twelve months if the customer has not been delinquent in payment. The deposit will bear simple interest at the rate of 6 percent a year payable on the actual amount on deposit with the Carrier.

(M)

The minimum period for which service and facilities is furnished is one month, unless otherwise specified in this Tariff.

(M)

2.6.5 RESTORAL OF SERVICE CONDITIONS

If service is suspended for nonpayment, service will be restored upon receipt of payment of all charges due, which will include the charge for service and facilities during the time of suspension, and may include a restoral charge. If the Customer has a history of payments returned for insufficient funds, the Company may require payment be made by cash, money order or certified check. If payment is made by personal check, service will be restored only after clearance of the check by the bank.

2.7 NOTICE OF DISCONTINUANCE

A customer may provide 15 days prior notice for discontinuance after which billing for the discontinued service will cease, or:

A customer may request for immediate discontinuance of service and will be billed until the LEC disconnects the access service but such billing will not exceed 15 days.

2.8 SPECIAL TAXES, FEES, CHARGES

Insofar as practicable, any sales, use, privilege, excise, franchise or occupation tax, costs of furnishing service without charge or similar taxes or impositions levied by the Federal, State or Local government, or any political subdivision or taxing authority against the Carrier may be billed by the Carrier to its Customers on a pro- rata basis.

Advice No. 364

ADMINISTRATIVELY  
APPROVED FOR FILING

ISSUED: JULY 10, 1992

EFFECTIVE: AUGUST 9, 1992

# ORIGINAL

## SECTION 2 - GENERAL REGULATIONS

### 2.9 SPECIAL ACCESS SURCHARGE

A Special Access Surcharge applies to each termination of a channel service at a PBX or equivalent device capable of interconnecting the channel with the local exchange network. The surcharge applies to each multipoint termination at a Customer's location, and applies to analog and digital high capacity service on a per voice grade equivalent basis.

The Carrier will bill the Customer for the surcharge, subject to billing capability, on each channel service termination unless the Customer certifies that the channel service termination is exempt from the surcharge. The surcharge rate is specified in the applicable rate sections of this tariff.

#### 2.9.1 EXEMPTIONS FROM THE SURCHARGE

A Customer's channel service termination will be exempted from the monthly surcharge if the Customer certifies to the Carrier that:

- The channel service is terminated in a device which is not capable of interconnecting the service with the local exchange network.
- The channel service termination is associated with Switched Access Service that is subject to Carrier Common Line charges.
- The Channel Service is used for program audio transmission or television service.

Certification must be provided by the Customer when the channel service is ordered or changed. If a certification is not received from the Customer with the order or change of service, the surcharge will be applied.

If the Customer's service termination cannot be exempted as certified, the Carrier reserves the right to bill and/or back bill the Customer as necessary, including any penalty charges that may accrue to the Carrier.

#### 2.9.2 CREDITING THE SURCHARGE

Upon receipt by the Carrier of certification that the Customer's channel service termination is exempt from the surcharge, as specified in 2.9.1 preceding, the Carrier will not bill the Customer at the location certified as exempt.

APPROVED FOR FILING  
DECISION #: 55953

ISSUED: JULY 10, 1992

EFFECTIVE: AUGUST 9, 1992

ORIGINAL

SECTION 2 - GENERAL REGULATIONS

2.10 ALLOWANCE FOR INTERRUPTIONS

2.10.1 CREDIT ALLOWANCE FOR INTERRUPTIONS (OTHER THAN CHANNEL SERVICES)

When a Carrier-caused error or malfunction causes a Customer's service to be interrupted, the Carrier will provide a credit allowance not exceeding an amount equal to the proportionate charge that would have been billed to the Customer for the period of time the service was interrupted. However, if service is restored within 24 hours of the interruption report or detection by the Carrier, no allowance will be made. These same provisions apply when the Carrier requests the Customer to temporarily surrender their service.

2.10.2 CREDIT ALLOWANCE FOR INTERRUPTIONS ON CHANNEL SERVICES

A credit allowance will be given when a channel service is interrupted, except as specified in A. following. An interruption period begins when the Customer reports a channel service to be interrupted and releases it for testing and repair. An interruption period ends when the channel service is operative. If the Customer reports a channel service to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

In addition, there may be specific credit allowance regulations that only apply to a particular channel service. Those regulations are specified in the section of the tariff which is applicable to the specific channel service.

A. CREDIT ALLOWANCE DOES NOT APPLY FOR:

- Interruptions caused by the negligence of the Customer or others authorized by the Customer to use the service.
- Interruptions due to failure of power, equipment, systems or connections not provided by the Carrier.
- Interruptions during any period when the Customer or User has released a channel service for maintenance or rearrangement purposes, or for the implementation of a Customer order.
- Interruptions during periods when the Customer elects not to release the channel service for testing and/or repair.
- An interruption or group of interruptions, resulting from a common cause, for amounts less than one dollar.
- Interruptions during any period which the Carrier or its agents are not afforded access to the Customer's premises where the channel service is terminated.

APPROVED FOR FILING

DECISION #: 56734

If the Customer elects to use another means of communication during the period of interruption, the Customer must pay the charges for the alternative service used.

For calculating credit allowances for monthly service, every month is considered to have 30 days.

ISSUED: JULY 10, 1992

EFFECTIVE: AUGUST 9, 1992

ORIGINAL

SECTION 2 - GENERAL REGULATIONS

2.10 ALLOWANCE FOR INTERRUPTIONS (Cont'd)

2.10.2 CREDIT ALLOWANCE FOR INTERRUPTIONS ON CHANNEL SERVICES (Cont'd)

B. CALCULATION OF CREDIT ALLOWANCE

A credit allowance will be given for a channel service that is interrupted for 30 minutes or more. The credit allowance is determined in the following manner.

1. Calculate the average point value by adding the total monthly charges for the channel service. The sum is then divided by the total number of Customer locations on the service to obtain the average point value.
2. Calculate the average point value for one full day by dividing the average point value for one month by 30 days (1 above divided by 30).
3. Multiply the average point value for one day by the interruption period to be credited (see C.1 following) in order to determine the credit for one point (2 above x interruption period).
4. Multiply the credit for one point by the number of Customer locations affected to determine the credit allowance for the service (3 above x number of locations affected).

Example: A two-point private line channel with two Customer locations interrupted for three hours.

Total monthly charge	- \$1,200
Average point value	- \$1,200/2 = \$600.00
Average point value for one full day	- \$600/30 = \$20.00
Amount credited for one point	- \$20 x 1/5 = \$4.00
Total credit for the number of Customer locations affected	- \$4.00 x 2 = \$8.00

C. CALCULATION TABLE

The following table is used for calculating credit allowances for interruptions.

1. Interruptions of 24 Hours or Less

<u>Length of Interruption</u>	<u>Interruption Period to be Credited</u>
Less than 30 minutes	None
30 minutes up to, but not including 3 hours	1/10 day
3 hours up to, but not including 6 hours	1/5 day
6 hours up to, but not including 9 hours	2/5 day
9 hours up to, but not including 12 hours	3/5 day
12 hours up to, but not including 15 hours	4/5 day
15 hours up to 24 hours inclusive	one day

APPROVED FOR FILING

DECISION #: 56734

# ORIGINAL

## SECTION 2 - GENERAL REGULATIONS

- 2.10 ALLOWANCE FOR INTERRUPTIONS (Cont'd)  
2.10.2 CREDIT ALLOWANCE FOR INTERRUPTIONS ON CHANNEL SERVICES (Cont'd)  
C. CALCULATION TABLE(Cont'd)

Two or more interruptions of 30 minutes or more, during any period up to but not including three hours, shall be considered as one interruption.

### 2. Interruptions over 24 Hours

Interruptions over 24 hours will be credited 1/5 day for each three-hour period or fraction thereof. No more than one full day's credit will be allowed for any period of 24 hours.

### 2.11 SPECIAL SERVICE ARRANGEMENTS

Special service arrangements consist of offerings not provided for in the Carrier's applicable tariff. Rates and charges will apply based upon costs incurred and on the circumstances in each case.

These special service arrangements will be provided whenever, in the judgment of the Carrier, there is a valid reason for providing the service requested. In such cases, the Carrier reserves the right to require a minimum period longer than 1 month at the same location.

#### 2.11.1 WORK PERFORMED OUTSIDE REGULAR WORKING HOURS

The rates and charges specified in this tariff contemplate that work will be performed during regular working hours. If, at the request of the Customer, work is performed outside of regular working hours, the Customer may be required to pay any additional costs incurred.

#### 2.11.2 CONSTRUCTION CHARGES

The Carrier bases its rates and charges on services furnished under normal conditions. Installation of facilities involving unusual costs because of factors such as the time period, type of facility, or location requested by the Customer may result in special construction charges which will be based on costs incurred in addition to all other applicable charges.

APPROVED FOR FILING

DECISION #: 56734

SECTION 2 - GENERAL REGULATIONS

ORIGINAL

2.12 APPLICATION OF RATES AND CHARGES

Tariffed rates and charges specified for services offered under this Tariff are maximums. Any change to a tariffed rate or charge at or below the maximum level shall not be construed as an application to increase rates. For services offered under this Tariff the rates and charges floor is set at long run incremental cost. In a price list furnished to the Arizona Corporation Commission by this Carrier, the rates and charges are listed for service offered under this Tariff which are applicable at any given time. (T)  
(T)  
(C)

The Carrier will furnish the Commission a new price list reflecting change(s) to rates and charges on not less than one day notice prior to the effective date. New Tariff pages would be filed with the Commission for approval only when increasing maximum levels. (C)  
(C)

2.13 PROMOTIONAL OFFERINGS

From time to time, the Carrier may offer goods and services at a reduced rate or free of charge for promotional, market research, or rate experimentation purposes. Such offerings will be for a limited duration and Customers will be so notified.

2.14 CHANNEL SERVICE UNIT

Channel Service Units will be provided under this tariff only to the extent that such units are available under the Local Exchange Carriers Access Service Tariff, (i.e., units in a Local Exchange Carrier's inventory as of November 18, 1983).

Channel Service Units for use with Dataphone® Digital Service Local Channels, when provided, are subject to the following conditions:

- The Channel Service Unit can only be relocated within the same building or relocated to a different building on the same premises.
- An off premises move of the Channel Service Unit is considered a disconnect of service and is subject to the rules and regulations for installation of a new service.
- The Carrier will bill the Customer for the Channel Service Units from the effective date of this tariff.

2.15 ACCESS COST ADJUSTOR MECHANISM (ACAM)

An ACAM will be used by AT&T to adjust rates for services to reflect changes in local exchange access costs as directed by the Arizona Corporation Commission in Docket No. U-2428-86-268, Decision No. 55953, dated April 21, 1988.

ORIGINAL

SECTION 3 - SERVICE CHARGES

3.1 GENERAL

Service charges are one time charges that apply for service connections and changes, visits by the Carrier to the Customer's premises when trouble reports result from the use of Customer equipment or facilities, installation of jacks, and the charge for returned checks. They apply in addition to all other rates and charges for service. Service charges unique to channel services only are in Section 7.

3.1.1 CATEGORIES OF CHARGES

The charges are structured to reflect the work required in serving the Customer on each occasion. There are three major categories of charges described in this section:

A. SERVICE ORDERING CHARGE

A Service Ordering Charge is a charge to receive, record and process the Customer's request for service.

The service order charge applies on a per Customer-request basis. "Per Customer request" means work or service ordered by the Customer for completion for the same account at the same time and on the same premises. When a Customer orders more than one main line service and requests each service be installed at separate locations, the per service order treatment is applicable separately to each location.

B. PREMISES VISIT CHARGE

A Premises Visit Charge is a charge for the travel to the Customer's premises for requested work. No additional charges apply for successive visits for Carrier reasons. This charge does not apply for disconnect work.

C. LINE CONNECTION CHARGE

A Line Connection Charge is a charge to arrange a line connection, to provide service between the wire center and the Customer's premises. The charge applies to work which includes, but is not limited to:

- making and changing connections in the wire center.
- making and changing connections in distribution facilities between the wire center and the Customer's premises, including needed cross connections and testing work in the serving wire center.

### 3.2 MULTI-ELEMENT SERVICE CHARGES<sup>[3]</sup>

(T)

#### 3.2.1 APPLICATION OF MULTI-ELEMENT SERVICE CHARGES

	Maximum <sup>[2]</sup> <u>Simple</u>	Maximum <sup>[2]</sup> <u>Multi-</u> <u>Line</u>
<u>Service Ordering Charge, per order<sup>[1]</sup></u>		
- For connecting new or additional lines	\$ 74.00	\$ 87.50
- For other than connecting new or additional lines	28.50	46.25
- For Record Changes only	16.00	20.50
<u>Line Connection Charge, per line</u>		
- Install or connect new	32.50	32.50
- Move, Change, Rearrange, or Conversion	14.00	14.00
<u>Premises Visit Charge, per Customer Requested Visit</u>		
- Per premises	6.00	6.00

NOTE 1: When an order is subject to more than one service ordering charge, only the higher of the charges apply.

NOTE 2: See Price List for current rates.

NOTE 3: When applied to Channel Services these charges are grandfathered (N)  
as shown in Section 7.1 following. (N)

ORIGINAL

SECTION 3 - SERVICE CHARGES

3.3 MAINTENANCE OF SERVICE CHARGES<sup>[2]</sup>

When a trouble report requires a visit to a Customer's premises and the trouble is due to Customer equipment or facilities, a Maintenance-of-Service Charge applies. This charge varies according to the type of service involved as follows:

	Maximum <sup>[1]</sup> Maintenance-of-Service Charge	USOC	(M) (M)
- Dataphone® Digital Service	\$83.00	N/A	
- Channel Services <sup>[2]</sup>	51.55	N/A	

3.4 JACKS<sup>[2]</sup>

3.4.1 REGULATIONS

The charges for jacks cover Carrier installation at the interface on the Customer's premises.

These charges will apply to install, move or change a jack in addition to other appropriate service charges.

The charge will not apply to jacks reconnected in place.

Multiple line data jacks are usable with either fixed loss loop or programmable data equipment.

These charges are in addition to Service Charges preceding.

NOTE 1: See Price List for current rates.

NOTE 2: When applied to Channel Services these charges are grandfathered as shown in Section 7.1, following.

(M) Material has been moved to the Custom Network Services Tariff.

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.1 APPLICATION

Message Telecommunications Service applies to all calls made between two or more rate centers within the State of Arizona.

This service is provided for use by the Customer and may be used by others, when so authorized by the Customer, subject to the provisions of this tariff.

4.2 REGULATIONS

Regulations for MTS listed below are in addition to those contained in Section 2.

The message charges specified in this tariff are in payment for all service furnished between the calling and called stations.

The obligations of both Carrier and Customer as described in Section 2 also apply to MTS. In addition, during an MTS call the Customer should exchange identifying information with the called party to protect both their interests.

In order to control fraud, the Carrier may refuse to accept Calling Cards which it determines to be invalid.

Terms and conditions for AT&T Commercial Long Distance Service are set forth in Section 34 of this tariff.

4.3 TWO-POINT SERVICE

4.3.1 CLASSES OF SERVICE

There are five classes of calls. Charges apply according to the class of call the calling station selects.

A. DIAL STATION

Applies when the calling person dials the telephone number without the assistance of an operator and the call is billed to the calling number. Dial Station rates apply when the operator places a call when AT&T facilities are not available for dial completion, when there is trouble on the AT&T network, when the calling party is a Customer with disabilities, or when an AT&T service fault interrupts a call in progress and the Customer cannot redial the call. SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.3 TWO-POINT SERVICE (Cont'd)

4.3.1 CLASSES OF SERVICE (Cont'd)

B. CUSTOMER DIALED CALLING CARD STATION

Applies whenever charges for a Long Distance call are to be billed to a card authorized by the Company. There are three types of cards that may be used for billing purposes and the applicable rates depend on the type of card used. The three types are:

(D)

(D)

- AT&T CIID/891 Card - An AT&T Calling Card using a non telephone number Card Issuer Identifier (CIID) (14 digit), "891"(21 digit) international billing number format or "personal choice" format.
- Local Exchange Company Calling Card - A calling card issued by a local exchange company that is utilized for the billing of calls over the AT&T Network.
- Commercial Credit/Charge Card - A credit/charge card issued by a non-carrier that is utilized for the billing of calls over the AT&T Network.

A Card Adjustment Factor (CAF) is applied to the total charges billed to a Customer's AT&T CIID/891 Card.

(D)

(D)

Calling Card rates apply when calls are originated as specified below.

- Customer Dialed/Automated - The Customer dials the appropriate AT&T access code (e.g., 0, 00, 1010288+0, an AT&T designated number for completion of Customer Dialed Calling Card Calls) plus the desired telephone number and completes the call without the assistance of a live AT&T operator or the automated operator system and the call is billed to a Calling Card, or
- Customer Dialed and Operator Assisted - The Customer dials the appropriate AT&T access code (e.g., 0, 00, 1010288+0, an AT&T designated number for completion of Customer Dialed Calling Card Calls) plus the desired telephone number and Company operator assistance is limited to recording the Calling Card number for billing purposes, or
- Customer Dialed and Operator Must Assist - The Customer dials the appropriate AT&T access code (e.g., 0, 00, 1010288+0, an AT&T designated number for completion of Customer Dialed Calling Card Calls) plus the desired telephone number and the local exchange Operator Services equipment capability precludes the Customer from completing the call without the assistance of a Company Operator and the call is billed to the Customer's Calling Card.

In order to control fraud, the Company may refuse to accept a Calling Card which it determines to be invalid.

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.3 TWO-POINT SERVICE (Cont'd)  
4.3.1 CLASSES OF SERVICE (Cont'd)

ORIGINAL

C. OPERATOR DIALED CALLING CARD STATION

Operator Dialed Calling Card Station rates apply when (1) the Customer dials the appropriate AT&T access code (e.g., 0, 00, or 1010288+0), does not enter the called number and is transferred to a live AT&T Operator, and the completed call is billed to a Calling Card; or

(2) the Customer dials an AT&T designated number for completion of Customer Dialed Calling Card Calls, but fails to respond to system prompts and must be transferred to a Company Operator, and the completed call is billed to a Calling Card.

D. OPERATOR STATION

Applies when calls are completed with the assistance of an operator, except as otherwise specified for Dial Station, Customer Dialed Calling Card Station, Operator Dialed Calling Card Station, Person-to-Person and Real Time Rated classes of service. Different rates apply when Operator Station calls are billed to an AT&T CIID/891 card. Operator Station rates apply to:

- (a) Calls which are billed to a different telephone number (e.g., collect, bill to a third number).
- (b) Calls originated by dialing the appropriate operator code (e.g., 0, 00, 1010288+0) and paid for by depositing coins at a local telephone company or interexchange carrier owned public or semi-public telephones.
- (c) Public and semi-public coin telephones that use network coin signaling will not be suitably equipped to accept payment by coin for AT&T long distance calls. Alternative payment methods such as calling card, commercial credit card, billed-to-third-number, collect and AT&T prepaid card may be used for AT&T calls made from such telephones.

(N)  
|  
|  
|  
(N)

E. PERSON-TO-PERSON

Applies when a calling station names the particular party to be reached by an operator. The party may be a person, a mobile station, or a station, department or office reached through a Customer private branch exchange attendant. In addition Person-to-Person also applies when the calling party cannot speak to the intended person or station but agrees to speak to someone else or requests an operator to make arrangements with a person to receive a call at a specified time.

When a Customer requests that the Carrier employ a messenger to bring the called party to a telephone (messenger call), the call is charged as Person-to-Person; in addition to the charges for the message, any costs for messenger service are included in the billed amount.

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.3 TWO-POINT SERVICE (Cont'd)  
4.3.2 RATES AND CHARGES (Cont'd)

ORIGINAL

B. INITIAL MINUTE, ADDITIONAL MINUTES AND SERVICE CHARGES

Two-Point MTS rates are quoted in terms of initial minute, additional minutes and service charges in the Schedule of Rates.

1. Initial Minute

Initial minutes can be rated in whole minute increments or fractional minute increments depending on the calling plan selected, except for calls placed from a coin telephone which will be rated in three minute increments.

2. Additional Minute

Additional minutes can be rated in whole minute increments or fractional minute increments depending on the calling plan selected, except for calls placed from a coin telephone which will be rated in three minute increments.

3. Service Charge

A service charge applies to each Customer dialed Calling Card Station, Operator Station, Person-to-Person, and Real Time Rated call.

(D)  
|  
(D)

C. TIMING

On all calls other than Person-to-Person a message starts at the time communication is established between the calling station and the called telephone number.

On Person-to-Person calls, a message starts at the time communication is established between the person calling and the specified person, station or an agreed upon alternate called.

Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If one station "hangs up" but the other does not, chargeable time ends when the telecommunications network connection is released by automatic timing equipment or by the operator.

Chargeable time does not include time lost because of faults or defects in the service.

The time of day at the calling party rate center determines whether day, evening, night or weekend rates apply.

ISSUED: JUNE 29, 2001

EFFECTIVE: JULY 31, 2001

ORIGINAL

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.3 TWO-POINT SERVICE (Cont'd)

4.3.2 RATES AND CHARGES (Cont'd)

D. METHOD OF APPLYING RATES

1. The charge for Two-Point MTS is determined by the distance between stations, time of day and day of week, duration of the call and class of call.
2. Determination of Airline Mileages
  - (a) Two-Point MTS rates between points in Arizona are based on the airline distance between rate centers.
  - (b) The rate centers and the central offices for the State of Arizona are listed by rate center and wire centers by exchange located in the Administrative Tariff Practice, Section 7, Attachment A.
  - (c) For the purpose of determining airline mileage, vertical and horizontal grid lines have been established across the United States. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. A vertical (V) and horizontal (H) four digit coordinate is computed for each rate center from its latitude and longitude location on a map. The intersection of the horizontal grid and the vertical grid identifies the V and H coordinates. The distance between any two-rate centers is the airline mileage computed between their respective coordinate intersections. The methodology used to determine rate mileage can be found in AT&T's Service Guides. The rates applicable to mileage bands are provided in the Schedule of Rates. (C)
3. In cases where a message begins in one rate period and ends in another, the Initial Period rate is the rate in effect at the time connection is established. The rate for the Additional Period is the rate in effect at the beginning of each Additional Period.
4. If the total computed charges for a call include a fraction of a cent, the fractional amount is dropped.

H. OPERATOR DIALED SURCHARGE

In addition to the charges in 4.3.2.E., an Operator Dialed Surcharge applies to Operator Station and Person-to-Person calls when the Customer has the capability of dialing all the digits necessary to complete a call, but elects to dial the appropriate operator code ("0", "00" or "1010288+0") and requires prompting by the operator system to dial the called station or requests the operator to dial the called station. (T)

The Surcharge does not apply to:

- Calls where a Customer cannot otherwise dial the call, due to defective equipment or trouble on the AT&T Telecommunications Network.
- Calls in which a Company Operator places a call for a calling party who identifies himself/herself as being a Customer with disabilities and is unable to dial the call because of his/her disability.
- Calling card calls.

See Price List for current rate.

DECISION #: \_\_\_\_\_

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.3 TWO-POINT SERVICE (Cont'd)  
4.3.2 RATES AND CHARGES (Cont'd)

K. NON-SUBSCRIBER SERVICE CHARGE [1]

ORIGINAL

A service charge is applicable to interLATA Dial Station, Operator Station, Person-to-Person or Real Time Rated Calls billed to residential lines which are presubscribed to an interexchange carrier other than AT&T, or not presubscribed to any interexchange carrier. This charge is in addition to the initial period and additional period charges as well as any applicable service charges for operator handled calls.

The Non-Subscriber Service Charge does not apply to: calling card calls, intraLATA calls, conference calls, calls to AT&T Directory Assistance, or 800, 900 telephone numbers, calls using Busy Line Verification or Interruption Services, calls using Telecommunications Relay Service, calls originated from cellular phones, calls billed to residential lines which have discontinued presubscription to AT&T but for whom an active billing record still exists in AT&T's billing system, calls made via AT&T Prison Collect with Controls Service, or to collect calls accessing the AT&T network via 1-800 CALLATT. (D)

AT&T will credit any Non-Subscriber Service Charges reported by newly presubscribed AT&T Customers during the period between presubscription and administrative processing of the new Customer. AT&T will also credit any Non-Subscriber Service Charges reported by Customers during an F.C.C. reportable incident of service outage by another interexchange carrier. To receive either of these credits, Customers must contact AT&T through an 800 number designated for billing inquiries. The credit will be given either in the form of a bill credit or a Long Distance Certificate, at AT&T's discretion.

L. PUBLIC PAYPHONE SURCHARGE [1]

A Public Payphone Surcharge applies to all completed consumer intrastate long distance calls placed from a public/semi-public payphone which are not paid on a sent paid basis. Specifically, the Public Payphone Surcharge applies to: (1) calling card service; (2) collect calls; (3) calls billed to a third number; (4) calls to intrastate Directory Assistance; (5) calls completed via AT&T DIRECTORY LINK Service; and (6) calls utilizing an AT&T Prepaid Card; (7) AT&T "00" INFO Service calls; and (8) AT&T 800 Plan P Service Calls. (D)(T) (T) (T) (T)

The Public Payphone Surcharge is applied in addition to any other applicable Service Charges or Surcharges.

The Public Payphone Surcharge does not apply to:  
- Calls paid for by inserting coins at the public/semi-public payphone.  
- Calls placed from stations other than public/semi-public payphones.

NOTE 1: See Price List for current rates.

DECISION #: N/A

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

ORIGINAL

4.4 OPERATOR-HANDLED CONFERENCE SERVICE

4.4.1 APPLICATION

Operator-Handled conference service provides simultaneous connections between three or more main stations or private branch exchange trunks or combinations thereof.

An operator connects all stations and attempts to arrange a conference call at a time specified by the Customer. The conference call may be arranged so that all stations can communicate or so that one station transmits and all others receive.

No holiday rates apply to conference service.

4.4.2 BILLING

Charges for conference service may be reversed to one of the called parties provided the total charge for all connections on a call is billed to one designated station.

If more than ten conference points are connected at one time, the minimum rate will be for a ten minute conference connection.

When suitable facilities are not available to allow connection of the requested number of conference points, a special charge, in addition to the initial and additional period rates, may apply for the equipment needed to make the connection.

4.4.3 TIMING OF CALLS

The timing regulations previously specified also apply to conference service.

Chargeable time begins when all connections are established.

A message ends when the connection is terminated at the originating point.

Chargeable time ends on any two point connection of a conference call when the called station hangs up.

4.4.4 RATES AND CHARGES

Rate airline distances for conference service are determined using the V-H system, as described preceding.

Rates are quoted in terms of initial and additional periods. The total charge is the sum of the two.

APPROVED FOR FILING

DECISION #: 58059

(M)

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.4 OPERATOR-HANDLED CONFERENCE SERVICE (Cont'd)  
4.4.4 RATES AND CHARGES (Cont'd)

ORIGINAL

A. INITIAL PERIOD

1. All Initial Period rates are for conference connections of one minute or any fraction thereof.
2. Initial Period rate is the sum of the initial minute period charges as determined by the Schedule of Rates (Section 4.3.2.E.4.), plus the Operator-Handled Conference Service Charge for each conference point from the originating station.

B. ADDITIONAL PERIOD

All Additional Period rates are for each additional minute or any fraction thereof that the conference connection continues beyond the initial period.

Additional Period rate is the sum of the additional minute charges for each conference point from the originating station as determined by the Schedule of Rates.

C. OPERATOR HANDLED CONFERENCE SERVICE

Maximum [1]  
Charge

- Per Call

\$6.00

D. APPLICATION OF RATE PERIODS

In cases where a message begins in one rate period and ends in another, the Initial Period rate is the rate in effect at the time connection is established. The rate for the Additional Period is the rate in effect at the beginning of the Additional Period.

4.5 SPECIAL PERIOD DISCOUNT

4.5.1 APPLICATION

Special period discount is for selected hours on selected days as determined by the Carrier.

Special period discount applies only to intrastate long distance message telecommunications Dial Station service between points within the State of Arizona.

The rate for Dial Station calls originated during the selected hours will be determined by the Carrier. This rate will apply only if it is less than the regular rate for a Dial Station call.

NOTE 1: See Price List for current rates.

4.7 AT&T SELECTCALL SERVICE

4.7.1 DESCRIPTION

AT&T SelectCall is an AT&T Long Distance Service that permits the Customer (subscriber) to receive direct dialed calls originated over the AT&T network from subscriber-authorized telephone numbers and have those calls automatically reverse-billed to the Customer without the assistance of a Company operator. Intrastate service is furnished where facilities and billing capabilities permit, and is an add-on to the interstate AT&T SelectCall Service. All terms and conditions, features and functions, installation and monthly, and any other charges except for intrastate usage will apply as described in the interstate plan.

(C)

4.9. AT&T UNLIMITED PLAN

ORIGINAL

(N)

4.9.1 DESCRIPTION

Residential Customers who currently subscribe to or select AT&T as their Primary Interexchange Carrier can enroll in this Plan. Customers can enroll in this Plan by completing and returning an enrollment form provided by AT&T, calling an AT&T designated 800 number, by enrolling during a marketing contact with AT&T, or via a company-designated Internet address.

Customers must agree to receive a billing statement from AT&T for all their AT&T calls, and agree not to receive individual call details for any calls that are included in the unlimited calling portion of this plan, such as minutes of usage, time-of-day called, and originating or terminating points of call.

This plan is offered in conjunction with the AT&T interstate plan and is available where billing and technical capability exists. All other terms, conditions and customer eligibility under this plan are specified in the AT&T Consumer Service Guide.

4.9.2 RATES AND CHARGES

Customers subscribed to this plan must pay a monthly recurring charge, as specified in the interstate AT&T Consumer Guide. The monthly recurring charge will entitle the customer to unlimited direct dialed station interstate and intrastate long distance calls to residential telephone lines that are subscribed to AT&T as their Primary Interexchange Carrier. The monthly recurring charge applies whether or not a customer makes any calls.

Eligible Dial Station intrastate long distance calls that are not placed to residential telephone lines that are subscribed to AT&T as their Primary Interexchange Carrier will be charged a per minute rate that is in effect all day, seven days a week. This includes, but is not limited to, calls to: telephone lines that are subscribed to a Primary Interexchange Carrier other than AT&T; customers of AT&T Broadband local service (other than those AT&T Broadband local telephone customers who either are enrolled in this plan, or are notified by AT&T Consumer that their AT&T long distance plan is an AT&T Consumer long distance plan); on-line services or Internet access services; wireless devices (e.g. phones or pagers); businesses; and subscribers to a business customer calling plan.

Rates and Service Charges for Calling Card Calls and Operator-Handled Calls apply as specified in Section 4.3.2.E of this tariff.

SECTION 4 - MESSAGE TELECOMMUNICATIONS SERVICE

4.10 AT&T DIRECTORY SERVICES

4.10.1 DIRECTORY ASSISTANCE SERVICE

Intrastate Directory Assistance service allows Customers to request information from Directory Assistance records. Customers may access this service by dialing the area code (NPA) for the telephone number(s) desired plus 555-1212. Directory Assistance charges apply to all requests. Customers are allowed a maximum of two requests for listings within the area code dialed per call to Directory Assistance. The Directory Assistance Charge applies whether or not the requested telephone number(s) is furnished (e.g., where the requested telephone number is unlisted, non-published or no record can be found). In addition to the Directory Assistance Charge, Customers are charged the appropriate Operator Service Charges as specified in Section 4.3.2. Person-to-Person and collect calls to Directory Assistance are not permitted.

Maximum Rate [1]

Per Call \$ 3.00

4.10.2 DIRECTORY LINK SERVICE

AT&T DIRECTORY LINK Service permits a Customer to complete a call to the called station telephone number received from Intrastate Directory Assistance without hanging up and originating a separate call. The terms and conditions are contained in the interstate plan. (C)  
(C)

SECTION 5 - OPTIONAL CALLING PLANS

5.1 REACH OUT ARIZONA

For the monthly recurring rate, Reach Out Arizona provides residential Customers an hour allotment consisting of up to 60 calls (T) of intrastate, distance insensitive, dial station, long distance service in the Night/Weekend rate periods. Calling in excess of one hour is billed at a lower minute rate. An additional percent discount is applied to the monthly total charges of Evening rated calls.

5.1.1 REGULATIONS

The minimum service period for the Reach Out Arizona is one month. Customers who retain service for less than one month will be billed the monthly recurring rate.

Reach Out Arizona is provided only where billing capability permits.

Customers selecting Reach Out Arizona may not subscribe to any other AT&T intrastate optional calling plan.

Reach Out Arizona does not include Directory Assistance, Conference Service, operator-handled, or calling card calls.

The charges and discounts in effect under this plan apply to all lines and trunks billed to the same billing number (one account).

Reach Out Arizona may be discontinued by the customer upon written or telephonic notice to AT&T. In addition, AT&T will discontinue a Customer's subscription to the Plan in the following situations:

- When AT&T is notified, on or after November 25, 1991, that the Customer has changed its primary interexchange carrier to a carrier other than AT&T after the Customer subscribed to the Plan, and the Customer has not notified AT&T that it wishes to continue such Plan. Discontinuance will be effective as of the date the Customer changed its primary interexchange carrier.
- When AT&T has notified a Customer who changed its PIC to a carrier other than AT&T prior to November 25, 1991 in writing that it plans to discontinue the Customer's Plan and the Customer does not, within 30 days of such notification, notify AT&T that it wishes to continue such Plan. Discontinuance will be effective 30 days from AT&T's mailing of its notification to the Customer.

## SECTION 5 - OPTIONAL CALLING PLANS

### 5.1 REACH OUT ARIZONA (Cont'd)

#### 5.1.2 RATES AND CHARGES

The monthly rate is in addition to all rates and charges for all other telephone service.

If continuous service exceeds one month, the charges for a fractional part of a month will be a proportionate part of the monthly charges for the Initial Period of night/weekend use, based on usage.

	Maximum Charge [3]	USOC
- Initial hour of night/weekend use, per month	\$ 9.00	TS1BT
- Additional minute of night/weekend use, each(1)	.1166	N/A
- Evening use	(2)	N/A
- Nonrecurring establishment charge, per account (No other service charges apply.)	10.00	N/A

NOTE 1: Where billing capability exists: otherwise the additional period will be billed at an hourly rate of \$7.00. When additional usage is a fraction of an hour the Customer will be charged the proportionate fraction of the additional hourly rate.

NOTE 2: Evening rates apply as found in Section 4.3.2.E.1. preceding. However an additional discount of 15% applies to the total charges for evening rated calls, not to individual messages.

NOTE 3: See Price List for current rates.

SECTION 5 - OPTIONAL CALLING PLANS

5.44 AT&T UNLIMITED SUNDAYS PLAN

Residential Customers who currently subscribe to or select AT&T as their Primary Long Distance Carrier can enroll in this plan by completing and returning an enrollment form provided by AT&T, calling an AT&T designated 800 number, or by enrolling during a marketing contact with AT&T.

Customers subscribed to this plan must pay a monthly recurring charge of \$29.85 (MAXIMUM RATE [1]), as specified in the interstate Consumer AT&T Service Guide.

This plan provides unlimited Sunday minutes of direct dialed 1+ state-to-state and in-state long distance calling for residential voice service only. If it is determined that usage is not consistent with residential voice applications, such as for Internet access services, commercial facsimile or auto-dialing, call forwarding, three-way calling, resale, telemarketing or other non-residential uses, AT&T may immediately suspend, restrict or cancel your service without prior notice.

(T)

(D)

(D)

The Sunday rate period is 12:00 a.m. through 11:59 p.m. Sunday. The weekday and Saturday rate period is 12:00 a.m. Monday through 11:59 p.m. Saturday. AT&T will rate eligible direct dialed station state-to-state and in-state long distance calls at 21¢ a minute (MAXIMUM RATE [1]), 24 hours a day, everyday except Sunday.

Rates and Service Charges for Calling Card Calls and Operator-Handled Calls apply as specified in Section 4.3.2.E of this tariff.

This plan is offered in conjunction with the interstate AT&T Unlimited Sundays Plan and is available where facilities and billing capabilities permit. All other terms, conditions and Customer eligibility under this promotion are specified in the Consumer AT&T Service Guide.

[1] See Price List for current rates or promotional offers.

SECTION 5 - OPTIONAL CALLING PLANS

5.45 AT&T UNLIMITED WEEKENDS PLAN

Residential Customers who currently subscribe to or select AT&T as their Primary Long Distance Carrier can enroll in this promotion by completing and returning an enrollment form provided by AT&T, calling an AT&T designated 800 number, or by enrolling during a marketing contact with AT&T.

Customers subscribed to this plan must pay a monthly recurring charge of \$44.85 (MAXIMUM RATE [1]), as specified in the interstate Consumer AT&T Service Guide. (T)

This plan provides unlimited weekend minutes of direct dialed 1+ state-to-state and in-state long distance calling for residential voice service only. If it is determined that usage is not consistent with residential voice applications, such as for Internet access services, commercial facsimile or auto-dialing, call forwarding, three-way calling, resale, telemarketing or other non-residential uses, AT&T may immediately suspend, restrict or cancel your service without prior notice. (T)

(D)

(D)

The weekend rate period is 12:00 a.m. Saturday through 11:59 p.m. Sunday. The weekday rate period is 12:00 a.m. Monday through 11:59 Friday. AT&T will rate eligible direct dialed station state-to-state and in-state long distance calls at 21¢ a minute (MAXIMUM RATE [1]), 24 hours a day, and every weekday.

Rates and Service Charges for Calling Card Calls and Operator-Handled Calls apply as specified in Section 4.3.2.E of this tariff.

This plan is offered in conjunction with the interstate AT&T Unlimited Weekends Plan and is available where facilities and billing capabilities permit. All other terms, conditions and Customer eligibility under this promotion are specified in the Consumer AT&T Service Guide.

[1] See Price List for current rates or promotional offers.

SECTION 5 - OPTIONAL CALLING PLANS

5.46 AT&T UNLIMITED PLUS PLAN (USOC: BLKCH)

Residential Customers who currently subscribe to or select AT&T as their Primary Long Distance Carrier can enroll in this plan by completing and returning a written subscription form to AT&T, calling an AT&T designated 800 number to subscribe, or by subscribing during a marketing contact with AT&T.

Customers subscribed to this plan must pay a monthly recurring charge as specified in the interstate Consumer AT&T Service Guide.

This plan provides unlimited minutes of direct dialed 1+ state-to-state and in-state long distance calling for residential voice service only. If it is determined that usage is not consistent with residential voice applications, such as for Internet access services, commercial facsimile or auto-dialing, call forwarding, three-way calling, resale, telemarketing or other non-residential uses, AT&T may immediately suspend, restrict or cancel your service without prior notice.

(D)

(D)

Rates and Service Charges for Calling Card Calls and Operator-Handled Calls apply as specified in Section 4.3.2.E of this tariff.

This plan is offered in conjunction with the interstate AT&T Unlimited Plus Plan and is available where facilities and billing capabilities permit. All other terms, conditions and Customer eligibility under this plan are specified in the Consumer AT&T Service Guide.

7.4 FEATURES (Cont'd)

7.4.1 General (Cont'd)

V. Inside Wire Maintenance Plan

The optional Inside Wire Maintenance Plan will provide diagnosis and repair of the customer-owned inside phone wire and jacks with no additional charges for the service call or for time and materials. This service is billed to the Customer as a monthly recurring charge on a per-line basis.

The Plan is provided only on analog Local Service Customer lines. AT&T will provide a service technician to diagnose service problems and repair defects in the Customer telecommunications equipment and facilities from the demarcation point to the Customer telephone jacks and extensions. The Service Plan does not include repair or replacement of telephone sets or repairs to non-standard wire and jacks that do not comply with Part 68 of the FCC Rules. It also does not include repairs to problems that existed prior to Customer's subscription to the Service. The Service Plan covers only service problems within Customer's premises at the location to which the service technician is dispatched and does not cover problems related to or caused by third party providers of telecommunications services. AT&T will not be responsible for restoration of premises if asked to repair concealed wire.

The Customer is responsible for obtaining and/or providing access to all areas of the Customer premises necessary to diagnose and repair the Customer service or equipment problems. If the Customer fails to provide this access during regular business hours, AT&T will not be responsible for diagnosis or repair.

If a customer does not wish to continue to be enrolled in the Plan, the customer may terminate the plan by contacting AT&T.

For rates and charges refer to the Price List.

7.4 FEATURES (Cont'd)

7.4.1 General (Cont'd)

V. Inside Wire Maintenance Plan (Cont'd)

Maintenance Service Call

AT&T provides its Customers with an optional Inside Wiring Service which is available on a per use basis and referred to as the Maintenance Service Call. This option is available to Customers who do not have the AT&T Inside Wire Maintenance Plan prior to the time the trouble is reported. The customer contacts AT&T to perform the diagnosis and repair functions for the reported occurrence and AT&T dispatches a service technician to the Customer's service location. AT&T charges a fixed price for the premise service visit; the fee will be appear as a one-time charge on the Customer's AT&T phone bill for each unique dispatch requested/required. The Service Call option is available to both new and existing Customers.

Service Calls are provided only on analog Local Service Customer lines. AT&T will provide a Service technician to diagnose service problems and repair defects in the Customer telecommunications equipment and facilities from the demarcation point to the Customer telephone jacks and extensions. The Service does not include repair or replacement of telephone sets or repairs to non-standard wire and jacks that do not comply with Part 68 of the FCC Rules. The Service covers only service problems within Customer's premises at the location to which the Service technician is dispatched and does not cover problems related to or caused by third party providers of telecommunications services. AT&T will not be responsible for restoration of premises if asked to repair concealed wire.

The Customer is responsible for obtaining and/or providing access to all areas of the Customer premises necessary to diagnose and repair the Customer service or equipment problems. If the Customer fails to provide this access during regular business hours, the Customer will nonetheless be responsible for the charges.

For rates and charges refer to the Price List.

SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

9.1 CONNECTIONS

9.1.1 GENERAL PROVISIONS

When Customer equipment is connected to MTS or WATS, it must comply with the FCC Registration Program. If Grandfathered Customer equipment, test equipment or communications systems are connected, the Minimum Protection Criteria specified in this Tariff must be met.

Grandfathered Customer equipment that was directly connected under Part 68 of the FCC's Rules and Regulations must conform to the following conditions:

- The terminal equipment was directly connected to the telecommunications network, local exchange service or to a circuit as a Category I connection prior to July 1, 1979.
- The multi-line terminating system was directly connected to the telecommunications network, local exchange service or to a circuit as a Category I connection prior to January 1, 1980.
- The terminal equipment or multi-line terminating system was directly connected to a circuit as a Category III connection prior to May 1, 1983.
- The protective circuitry was directly connected to the telecommunications network, local exchange service or to a circuit as a Category I or Category III connection, prior to the dates set forth above.

9.1.2 CUSTOMER RESPONSIBILITY

The Customer is responsible for the installation, operation and maintenance of any terminal equipment or communications system provided by the Customer. No combination of terminal equipment or communications system shall require change in or alteration of the services of the Carrier, cause electrical hazards to Carrier personnel or its agents, damage to Carrier equipment, malfunction of billing equipment, or degradation of service to persons other than the user of the subject terminal equipment or communications system, the calling or called party. Upon notice from the Carrier that the terminal equipment or communications system is causing such hazard, damage, malfunction or degradation of service, the Customer shall make such change as shall be necessary to remove or prevent such hazard, damage, malfunction or degradation of service.

APPROVED FOR FILING

DECISION #: 55953

ORIGINAL

SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

9.1 CONNECTIONS (Cont'd)  
9.1.2 CUSTOMER RESPONSIBILITY (Cont'd)

The Carrier will take immediate action to protect its services or interests if this regulation is violated, see Termination of Service for Cause, Section 2.

When a repair person is dispatched, a Maintenance of Service Charge will apply if testing discloses that the service is functioning correctly. See Maintenance of Service Charge, Section 3.

Prior to reconnecting grandfathered equipment to Carrier services, the Customer must provide the following information about the equipment to the Carrier:

- Manufacturer's name, model number and type
- Ringer Equivalence Number and Type (if known)
- Type of standard jack (if required)
- Service to which equipment is being connected
- Notarized affidavit for premises wiring
- Description of interface
- Line or pin assignment for a multiline jack

The Customer must also notify the Carrier when the grandfathered equipment is permanently disconnected.

9.1.3 CARRIER RESPONSIBILITY

In addition to furnishing and maintaining components for its services, the Carrier will provide technical information pertaining to interface parameters as an aid to the Customer in selecting the appropriate interface.

APPROVED FOR FILING  
DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

- 9.1 CONNECTIONS (Cont'd)  
9.1.3 CARRIER RESPONSIBILITY (Cont'd)

The Carrier is not responsible to any party if a change in its service components, Minimum Protection Criteria, operations, or procedures which are consistent with the Registration Program, (1) affects any facilities, Customer equipment or communications systems provided by others in any way, or (2) requires their modification in order to be used with Carrier services. However, if such changes can be reasonably expected to materially affect the operating or transmission characteristics of the services or render any Customer premises equipment or communications system incompatible with the services, the Carrier will make a reasonable effort to notify the Customer in writing of the proposed change. A reasonable interval will be allowed before the change is implemented to enable the Customer to maintain compatibility of the Customer equipment or communications system with Carrier services.

Telecommunications services may or may not be suitable for use with all types of terminal equipment or systems, and where such equipment or system is connected to Carrier facilities the responsibility of the Carrier shall be limited to the furnishing of facilities suitable for telecommunications services and to the maintenance and operation of such facilities in a manner proper for such telecommunications services. Subject to this responsibility the Carrier shall not be responsible for (1) the through transmission of signals generated by terminal equipment or systems, or for the quality of, or defects in, such transmission or (2) the reception of signals by terminal equipment or system, or (3) address signaling.

- 9.1.4 SERVICE PROVIDED BY A LOCAL EXCHANGE CARRIER

Carrier services may be connected to services provided by a Local Exchange Carrier. The connections are subject to the regulations in this Tariff and the appropriate tariff(s) of the local exchange carrier.

APPROVED FOR FILING  
DECISION #: 55953

ISSUED: JULY 10, 1992

EFFECTIVE: AUGUST 9, 1992

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.5 CONNECTIONS OF COMMUNICATIONS SYSTEMS

When a communications system or switched service is connected to the Carrier's services, the Customer must make all arrangements concerning the connected systems or service with its provider. The connection does not constitute a joint undertaking between this Carrier and the provider of the system or service. The system or service must be operated and maintained so it will work satisfactorily with the Carrier's services. Connections to service will be made in accordance with the following:

- When MTS, WATS, or 800 Service is connected to a communications system which is also connected to switching or terminal equipment such equipment shall provide the necessary network control signaling, e.g., answer supervision.
- The connection at the service interface must be made so that it continually complies with the specified Minimum Protection Criteria. See Minimum Protection Criteria following.
- When a communications system fails and the connection to services is not through switching equipment, the communications system must be arranged to promptly return the service to an idle (on-hook) state. In addition, the Customer must promptly notify the Carrier when the communications system fails.

The design, maintenance and operation of telecommunications service envisions that communications will originate or terminate at a station of the associated service. Connections of communications systems may be made to facilities furnished by the Carrier for telecommunications service at a premises where the Customer does not originate or terminate communications. The Carrier will not be responsible for the through transmission of signals or for the quality of transmission on such connections.

APPROVED FOR FILING

DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.6 CONNECTIONS OF CUSTOMER PREMISES EQUIPMENT SUBJECT TO THE REGISTRATION PROGRAM

When Customer premises equipment is connected to certain exchange services it must comply with the FCC's Registration Program. (For simplicity, such Customer premises equipment will be referred to as "registered equipment" or "grandfathered equipment," as appropriate, in this section.)

#### A. CATEGORIES OF CONNECTIONS

Connections to all exchange services have been classified as Category I, Category II or Category III for the purpose of this Tariff. The category is determined by the type of exchange service and the type of Customer premises equipment connected to it. A table which identifies the Category I and Category III connections is included in this section.

#### 1. Category I and Category III Connections

A Category I or III connection results when certain specified premises equipment is connected to an exchange service which is arranged for a specific type of operation. When Customer premises equipment is connected as a Category I or Category III connection it must comply with the Registration Program.

If grandfathered premises equipment, test equipment or a communications system is connected to an exchange service, the Minimum Protection Criteria specified in this section must be complied with at the interface point. All connections will be made at the interface point of the exchange service. The type of operation, type of premises equipment and resulting Category I or III connection is shown in the following table.

APPROVED FOR FILING DECISION #: <u>55953</u>

EFFECTIVE: AUGUST 9, 1992

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.6 CONNECTIONS OF CUSTOMER PREMISES EQUIPMENT SUBJECT TO THE REGISTRATION PROGRAM (Cont'd)

##### A. CATEGORIES OF CONNECTIONS (Cont'd)

<u>Type of Circuit</u>	<u>Premises Equipment Connected*</u>	<u>Connection Category</u>
Off-Premises Station Line	TE or MLTS (station end) MLTS (private branch exchange end)	I III
Tie Line	MLTS (connected as a trunk termination)	III
Trunk to Station Tie Line	MLTS (connected as a trunk termination at the station end)	I

\*TE - Terminal Equipment  
System

MLTS - Multiline Terminating

##### 2. Category II Connections

Connections to all other services are classified as Category II. Category II connections are not within the scope of the Registration Program. The regulations regarding Category II connections are in D. following.

##### B. JACKS

Jacks to connect registration equipment with Carrier facilities are furnished at the rates and charges specified in Section 3.

##### C. CONNECTIONS UNDER CERTIFICATION PROGRAMS

Customer premises equipment that was connected under the following programs as of their expiration date may remain connected as grandfathered equipment under the Registration Program.

##### 1. Attestation - Expiration date July 1, 1980

Customer headsets and non-powered conferencing equipment may remain connected, be moved and reconnected according to the standards and procedures listed in the technical references for attested equipment.

APPROVED FOR FILING

DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

- 9.1 CONNECTIONS (Cont'd)
- 9.1.6 CONNECTIONS OF CUSTOMER PREMISES EQUIPMENT SUBJECT TO THE  
REGISTRATION PROGRAM (Cont'd)
- C. CONNECTIONS UNDER CERTIFICATION PROGRAMS (Cont'd)

- 2. Conformance - Expiration date July 1, 1979

Customer conforming answering devices may remain connected, be moved and reconnected according to the standards and procedures listed in the technical references for conforming answering devices.

- D. CONNECTIONS THROUGH CONNECTING ARRANGEMENTS

Certain Customer premises equipment connected to an exchange service as a Category I or Category III connection prior to the appropriate register only date(s), was connected through a grandfathered connecting arrangement. The Carrier will continue to provide those grandfathered connecting arrangements under the following conditions:

- 1. Moves and Reconnections

Customer premises equipment that is connected through a grandfathered connecting arrangement may be moved and reconnected. The grandfathered connecting arrangement used to reconnect the premises equipment will be provided, subject to its availability.

- 2. Protection Requirements

The Customer premises equipment must comply with the specified Minimum Protection Criteria in this section.

- E. COMMUNICATIONS SYSTEMS

- 1. Direct Electrical Connection

Communications systems, including systems provided by authorized users, may be connected with exchange services at the premises of the Customer or authorized user provided that:

The Customer has a regular and continuing requirement for the origination or termination of communications over the communications system and the normal mode of operation of the communications system shall be to provide communications originating or terminating at the premises on which the connection is made.

The connection shall be made through switching equipment provided either by the Customer or by the Carrier.

APPROVED FOR FILING

DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

- 9.1 CONNECTIONS (Cont'd)  
9.1.6 CONNECTIONS OF CUSTOMER PREMISES EQUIPMENT SUBJECT TO THE  
REGISTRATION PROGRAM (Cont'd)  
E. COMMUNICATIONS SYSTEMS (Cont'd)

When the connection is to WATS service, the Customer has a requirement to communicate over a WATS line to or from premises of that Customer located in the same rate state where the WATS initial period rate applies. Communications systems not subject to the FCC Rules and are not connected through switching equipment must terminate only in the WATS rate state in terminal equipment or multiline terminating systems subject to the FCC Rules.

To protect the telecommunications network, the connection of a communications system with facilities furnished for connection to a MTS or WATS access line or station apparatus provided by the Carrier as a part of a service provided by the Carrier to the same Customer, shall be through:

- a connecting arrangement as provided by the Carrier, or
- registered or grandfathered terminal equipment, communications systems, or protective circuitry which, either singulary or in combination assures that the requirements of Part 68 of the FCC's Rules and Regulations are met at the interface.

Communications systems which involve direct electrical connection must comply with the Minimum Protection Criteria set forth in this section.

In lieu of the total hardware protection requirements mentioned above, an alternative method for control of signal power only, as covered in this section, is available for the connections described in this paragraph.

### F. ACOUSTIC AND INDUCTIVE CONNECTIONS

Communications systems may be acoustically or inductively connected with Carrier facilities for exchange service as specified in 1. and 2. following, provided the acoustic or inductive connection is made externally to Carrier voice transmitting and receiving equipment.

1. Communications systems may be connected to exchange services at the premises of the Customer where the Customer has a regular and continuing requirement for the origination or termination of communications over the communications systems provided that:

APPROVED FOR FILING

DECISION #: 55953

ORIGINAL

SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

- 9.1 CONNECTIONS (Cont'd)  
9.1.6 CONNECTIONS OF CUSTOMER PREMISES EQUIPMENT SUBJECT TO THE  
REGISTRATION PROGRAM (Cont'd)  
F. ACOUSTIC AND INDUCTIVE CONNECTIONS (Cont'd)

The normal mode of operation of the communications system shall be to provide communications originating or terminating at the premises on which the connection is made;

2. Communications systems which involve acoustic or inductive connections must comply with the Minimum Protection Criteria set forth in this section.

9.1.7 OTHER CONNECTIONS

Except as otherwise provided in 9.1.6.E. preceding, communications systems will be connected, as specified below, with Carrier services furnished for such purposes under this tariff.

A. U.S. ARMY, NAVY AND AIR FORCE

Facilities of the U.S. Department of the Army, Navy or Air Force may be connected with facilities of the Carrier, subject to the regulations following, where the Secretary of the Department or his authorized representative notifies the Carrier in writing that the connection is required for reasons of military necessity. Such connections will be made by means of switching or connecting equipment.

Telephone facilities of the aforesaid Departments may be connected to a private branch exchange switchboard or other telephone switching or terminal equipment; provided, however, that the Department facilities will not be connected with the MTS network to form a through connection except in cases of emergency involving safety of life or property, unless such facilities are provided in locations where it is impracticable for the Carrier to furnish its facilities.

B. POWER, PIPE LINE AND RAILROAD COMPANIES

Facilities of an electric power company, or oil, oil products or natural gas pipe line company, or railroad company provided primarily to communicate with points located along a right-of-way (including premises of such company anywhere in cities, townships or villages along the right-of-way) owned or controlled by such company may be connected with facilities of the Carrier for the following purposes:

1. in cases of emergency involving safety of life or property;

APPROVED FOR FILING

DECISION #: 55953

ORIGINAL

SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

9.1 CONNECTIONS (Cont'd)

9.1.7 OTHER CONNECTIONS (Cont'd)

B. POWER, PIPE LINE AND RAILROAD COMPANIES (Cont'd)

2. in addition, in cases of calls originated by railroad employees under circumstances indicating need for prompt action to secure or maintain the safety, continuity, or reliability of railroad service to the public, and related to the movement of passengers, mail, property, or equipment by railroad, or the repair, maintenance, or construction of railroad right-of-way, structures, or equipment,
3. in cases where the Customer facilities serve locations where it is impracticable because of hazard or inaccessibility for the Carrier to furnish its facilities; and
4. during an interim period in cases where the Customer has arranged for replacement of said Customer facilities with facilities of the Carrier.
5. Telephone circuits of such companies will be connected with the network to form a through connection only through manual switching equipment, or an attendant position of dial private branch exchange equipment. Such equipment or position may be located at either or both ends of the Customer's circuit.
6. Connection of a Customer's telephone circuit as specified in 2., 3., 4. preceding may be established at either end of such circuit, but shall not be established at both ends simultaneously.
7. Facilities of the Carrier, when connected with facilities of the Customer, will not be used for communications of others than the Customer, except that such facilities may be used for the communications of, and be connected with facilities furnished by the Carrier to, other companies which (a) are operated with the Customer as parts of an integrated electric power, oil, oil products or natural gas pipe line system or railroad system under direct or common ownership or control; or (b) own or operate an electric power or pipe line or railroad system jointly with the Customer; or (c) own or operate electric power or pipe line or railroad facilities interconnected with those of the Customer. Carrier facilities when so connected may be connected with the exchange or toll network to form a through connection for communications of other companies specified above including calls originated by employees of such companies, only under the circumstances set forth in 1. and 2. preceding.

APPROVED FOR FILING  
DECISION #: 55953

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.7 OTHER CONNECTIONS (Cont'd)

#### C. CONNECTIONS TO EXCHANGE SERVICES

Terminal equipment and communications systems connected to exchange services specified in accordance with 9.1.6 preceding, prior to January 1, 1980 may remain connected and be moved and reconnected for the life of the equipment without registration unless subsequently modified. Effective May 1, 1983, new installations of terminal equipment or communications systems subject to Part 68 of the FCC's Rules and Regulations connected to such exchange services must meet the requirements of Part 68 of the FCC's Rules and Regulations.

#### D. CONNECTIONS OF FACILITIES FOR STATE GOVERNMENTAL AGENCIES USE ALONG HIGHWAYS

Facilities of a state or local governmental agency, provided primarily to communicate with fixed points or mobile units on or along highways operated, patrolled or maintained by the agency, may, in lieu of the provisions of 9.1.6 preceding, be connected with facilities furnished by the Carrier subject to the regulations following. Such connections will be made by means of switching or connecting equipment.

1. Customer telephone facilities may be connected to a private branch exchange switchboard or other telephone switching equipment of the Carrier for communication with stations and facilities associated with said switching equipment; provided, however, that a private branch exchange switchboard will not be connected with private telephone switching equipment located on the same general premises or in the same general local service area.
2. Equipment provided on the Customer facilities for the purpose of deriving telephone, teletypewriter or morse, data transmission, remote metering, supervisory control or miscellaneous signaling may be used, if suitable for such use.

APPROVED FOR FILING

DECISION #: 55953

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.7 OTHER CONNECTIONS (Cont'd)

#### E. U.S. GOVERNMENT EXECUTIVE DEPARTMENTS AND AGENCIES

Equipment of a Department or Agency of the Executive Branch of the U.S. Government used for the purpose of disguising or concealing the contents or meaning of communications may be connected with Carrier furnished exchange services where the head of the Department or Agency whose equipment is to be connected, or the authorized representative, notifies the Carrier in writing that such connection is required to safeguard official information in the interest of national defense, or other confidential official information disclosure of which to unauthorized persons would be detrimental to the public interest. Such connections shall be made by means of connecting equipment or arrangements furnished by the Carrier.

#### F. CONNECTIONS INVOLVING NATIONAL DEFENSE AND SECURITY

In certain cases the FCC Rules permit the connection of non-registered equipment or systems to the telecommunications network, provided that:

1. The Secretary of Defense; the head of any other governmental department (having requisite FCC approval); or their authorized representative certifies in writing to the Carrier that:
  - (a) The connection is required in the interest of national defense and security;
  - (b) The equipment to be connected either complies with the technical requirements of the FCC Rules or will not cause harms to the telecommunications network or Carrier employees; and
  - (c) The work is supervised by an installation supervisor who meets the qualifications stated in the FCC Rules.

#### G. CONNECTIONS INVOLVING HAZARDOUS OR INACCESSIBLE LOCATIONS

Except as otherwise provided in 9.1.7.C. preceding, facilities furnished by the Customer which involve hazardous or inaccessible locations, i.e., mines or powder manufacturing companies, may be connected with exchange service furnished the Customer by the Carrier. The requirement for the use of a standard jack is waived for registered equipment connected in these locations.

APPROVED FOR FILING  
DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.7 OTHER CONNECTIONS (Cont'd)

#### H. CONNECTIONS OF SERVICES FURNISHED BY THE CARRIER TO THE SAME CUSTOMER

1. All connections will be made through connecting arrangements, switching arrangements or through switching equipment provided by the Customer or authorized user.
2. Customer terminal equipment or Customer multi-line terminating systems may be connected at a premises of a Customer to a MTS or a WATS access line to form a through connection. Such connection shall be through switching equipment provided by the Customer or the Carrier in accordance with the regulations contained in this Section.

The regulations specified in 9.1.6 preceding apply when a two-point or a multipoint channel is arranged for service solely between two points utilizing the above facilities types for data transmission.

- (a) The normal mode of operation of the communications system shall be to provide communications originating or terminating at the premises on which the connection is made.
- (b) The connection shall be made through switching equipment provided either by the Customer or authorized user.

#### I. CONNECTION OF SERVICES FURNISHED BY THE CARRIER TO DIFFERENT CUSTOMERS

Services furnished by the Carrier to one Customer may be connected to MTS or WATS access line furnished to a different Customer. Connections shall be made through switching equipment, provided by the Customer or authorized user.

#### J. CONNECTION OF SERVICES FURNISHED BY THE CARRIER WITH SERVICE OF OTHER CARRIERS

A communication system provided by an other carrier to a Customer or authorized user of an exchange service, furnished by the Carrier may be connected at the premises of the Customer or authorized user to the exchange service furnished by the Carrier where the Customer or authorized user has a regular and continuing requirement for the origination or termination of communications over the communications system of the other carriers.

APPROVED FOR FILING

DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.7 OTHER CONNECTIONS (Cont'd)

#### J. CONNECTION OF SERVICES FURNISHED BY THE CARRIER WITH SERVICE OF OTHER CARRIERS (Cont'd)

The normal mode of operation of the other carrier communications system shall be to provide communications originating or terminating at the premises at which the connection is made.

Connections shall be made only if the forms of electrical communication are the same and consistent with those for which the Carrier provided service is offered. Connections are not represented as being suitable for satisfactory transmission.

Where the connection of an other carrier communications system is by means of an acoustic or inductive connection, such connection shall be made externally to Carrier provided voice transmitting and receiving equipment.

Where the connection of an other carrier communications system is by means of a direct electrical connection, such connection shall be made:

through switching equipment provided either by the Customer, authorized user, or other carrier.

When the connection is by means of switching equipment provided by the Customer or authorized user such switching equipment and the facilities provided by the other carrier shall be treated as a communications system provided by the Customer and the regulations applicable to the connection of such communications systems, set forth in 9.1.6 preceding apply.

Where the Customer of such other carrier is an authorized user of an exchange service furnished by the Carrier and connection is made at the authorized user's premises, all communications over the interconnected facilities shall be between the authorized user and the Carrier's Customer and be related directly to the business of the Carrier's Customer.

Other Carrier's systems may be connected at the Customer's or authorized user's premises to station apparatus provided by the Carrier to the same Customer.

APPROVED FOR FILING

DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.7 OTHER CONNECTIONS (Cont'd)

#### J. CONNECTION OF SERVICES FURNISHED BY THE CARRIER WITH SERVICE OF OTHER CARRIERS (Cont'd)

All arrangements concerning services of an other carrier shall be made by the Customer with that carrier. The furnishing of exchange service by the Carrier is not part of a joint undertaking with the other carrier.

#### 1. Connection of Customer Test Equipment

##### (a) Direct Electrical Connections

Category I or Category III Connections - Customer test equipment may be connected to a voice grade channel service as a Category I or Category III connection at the Customer's premises. The connection can be through, (1) registered or grandfathered equipment which either singularly or in combination assures that all of the requirements of the Registration Program (total protection) are met at the circuit interface points, or (2) the Interim Program for the Connection of Customer Test Equipment following.

##### (b) Interim Program for the Connection of Customer Test Equipment.

Connections of Customer test equipment that do not provide protection against excessive signal power may be connected to a voice grade channel service as a Category I or III connection at the Customer's premises if the connection is made in accordance with the following:

- I. The test equipment is limited to transmission signal power generating and/or detection devices, or similar devices, utilized for the detection and/or isolation of a communications service fault.
- II. The test equipment is of a type that was lawfully directly connected to a circuit as of March 6, 1981. Such test equipment may remain connected, be moved or reconnected during the life of the test equipment unless it is subsequently modified.

APPROVED FOR FILING

DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.7 OTHER CONNECTIONS (Cont'd)

#### J. CONNECTIONS OF SERVICES FURNISHED BY THE CARRIER WITH SERVICE FOR OTHER CARRIERS (Cont'd)

- III. The connections are made through Carrier jacks or as otherwise authorized by the Carrier.
- IV. The test equipment, other than automatic test equipment utilizing responders (or their functional equivalents), must be installed, operated and maintained so that all the signal power requirements of Subpart D of Part 68 of the FCC's Rules and Regulations are complied with at the circuit interface point.
- V. Automatic test equipment utilizing responders (or their functional equivalents) must be installed, operated and maintained to comply with the signal power specifications in Section 8 of Compatibility Bulletin 106, Issue No. 2 and Technical Publication - PUB 60101.
- VI. The Customer must notify the Carrier of each circuit at each premises to which the Customer test equipment will be connected in advance of the initial connection. The Customer must also notify the Carrier when such test equipment is permanently disconnected at each premises.
- VII. The Interim Program for the Connection of Customer Test Equipment, unless sooner cancelled or changed, will remain in effect until a permanent program is adopted by the Federal Communications Commission as a result of Part 68 Rulemaking in CC Docket No. 81-216.

#### K. CATEGORY II CONNECTIONS

Customer test equipment may be connected to a channel service as a Category II connection at the Customer's premises if the test equipment meets the specified Minimum Protection Criteria at the circuit interface point. See Minimum Protection Criteria following.

APPROVED FOR FILING  
DECISION #: 55953

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.8 MINIMUM PROTECTION CRITERIA

##### A. GENERAL

Minimum Protection Criteria have been specified so that Carrier personnel or its agents, equipment, and services will be protected from the harmful effects of signal power overload and hazardous voltages. Minimum Protection Criteria apply to the direct electrical, acoustic, or inductive connections of Customer equipment and communications systems to Carrier services.

##### B. ALL CONNECTIONS

Customer equipment, test equipment and communications systems which are connected to services on a direct electrical basis or an acoustic or inductive basis, must comply with the following:

1. Since a circuit utilizes Carrier equipment in common with other circuits and services, it is necessary that the power of the signal applied to the circuit be limited in order to prevent excessive noise and crosstalk. Because each circuit is individually engineered, a single valued limit for all applications cannot be specified. Therefore, the power of the signal (for direct electrical connections in the band above 300 Hertz) which may be applied by the equipment to the interface will be specified by the Carrier for each application to be consistent with the signal power allowed on this Carrier's telecommunications network.
2. To protect other Carrier services, it is necessary that the signal which is applied at the interface meets the following limits:
  - (a) The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18dB below the power of the signal as specified in 1. above.
  - (b) The power in the band from 4,005 Hertz to 10,000 Hertz shall not exceed 16dB below one milliwatt.

APPROVED FOR FILING

DECISION #: 55953

ORIGINAL

SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

9.1 CONNECTIONS (Cont'd)

9.1.8 MINIMUM PROTECTION CRITERIA (Cont'd)

B. ALL CONNECTIONS (Cont'd)

- (c) The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24dB below one milliwatt.
  - (d) The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36dB below one milliwatt.
  - (e) The power in the band above 40,000 Hertz shall not exceed 50dB below one milliwatt.
3. To prevent the interruption or disconnection of a call, it is necessary that the signal applied at the interface be limited. Specifically, the signal at the interface shall at no time have energy concentrated solely in the 2450 to 2750 Hz band. If there is signal power at the interface in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

C. DIRECT ELECTRICAL CONNECTIONS

In addition to the regulations in B. preceding, Customer equipment, test equipment, and communications systems which are connected to MTS or WATS on a direct electrical basis must comply with the following:

To prevent excessive noise and crosstalk, it is necessary that the power of the signal presented at the central office not exceed 12dB below one milliwatt when measured over any three second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the premises equipment, test equipment or communications system to the interface will be specified for each Customer location. In no case shall the power exceed one milliwatt.

9.1.9 RECORDING OF TWO-WAY TELEPHONE CONVERSATIONS

The regulations, terms and conditions pertaining to the recording of two-way telephone conversations are identified in AT&T Business Services Guides.

(C)

# ORIGINAL

## SECTION 9 - CONNECTIONS OF PREMISES EQUIPMENT

### 9.1 CONNECTIONS (Cont'd)

#### 9.1.10 VIOLATION OF REGULATIONS

Where any terminal equipment or communications system is used with telecommunications services furnished by the Carrier and any of the connections provisions are violated, the Carrier will take such immediate action as appropriate for the protection of its facilities and will promptly notify the Customer of the violation. The Customer shall discontinue such use of the equipment or system or correct the violation and shall confirm in writing to the Carrier within ten days, following the receipt of written notice from the Carrier, that such use has ceased or that the violation has been corrected. Failure of the Customer to discontinue such use or to correct the violation and to give the required written confirmation to the Carrier within the time stated above shall result in termination of the Customer's service in accordance with the provisions stated in Section 2, until such time as the Customer complies with the provisions of this Tariff.

### 9.2 PROTECTIVE CONNECTING ARRANGEMENTS

#### 9.2.1 GENERAL PROVISIONS

Customer equipment and facilities may be connected to facilities of the Carrier, subject to the regulations, rates and charges specified herein.

In accordance with the provisions of Part 68 of the FCC Rules, installations of new connecting arrangements to facilities of the Carrier will not be made:

after July 1, 1979, for connection of Customer terminal equipment,

after January 1, 1980, for connection of Customer multi-line terminating systems.
